EXPERIENCE AND SKILLS

Being a computer science student, I have gained experience in multiple programming languages and also usage of several APIs.

I have excellent skills in working with HTML, CSS and JavaScript for developing front-end of websites and also Node-JS. I use PHP to develop the backend and connecting the system to a database for it to run. I have experience in using SQL commands to administer the database.

WordPress has also given me experience and I have used it too.

I have implemented the MPesa API in several projects that I have developed and it was working perfectly. Am good in python for Machine learning and I have concepts in java for mobile development and Kotlin also for my development. I have worked with C++ and C also C# for developing web applications.

I have experience working with any operating system from android, windows, chrome, MacOS and even the linux kernel.

Through the training with Digital Divide Data, have gained ML, AI and image annotation skills, how to read a LiDaR and interpret it.
